

# HARIHARAN V P

Bengaluru, India | 9019807194 | hariharanvp14@gmail.com | [LinkedIn](#) | [GitHub](#) | Portfolio

Full Stack Developer experienced in building accessible, production-grade web applications with React, Node.js, and MongoDB, with a strong focus on inclusive, user-centered design.

## EXPERIENCE

### Full Stack Developer - Deepwoods Trust

Dec 2025 - Mar 2026

Bengaluru, India

- Developed a web-based Talent Showcase & Community Platform enabling differently-abled individuals to share and highlight their skills.
- Built both frontend UI and backend REST APIs, integrating a database layer for user and content management.
- Implemented secure login, user profiles, and talent-upload features in collaboration with a cross-functional team.
- Conducted testing and debugging and supported deployment of the application to production.

## PROJECTS

### Stay - PG / Hostel / Dormitory Finder Platform | [stay-wm8p.vercel.app](#)

- Built a role-based accommodation platform enabling students and working professionals to discover PGs, hostels, and dormitories.
- Implemented secure authentication with JWT and Google OAuth, plus protected routes and separate dashboards for users and property owners.
- Developed property management functionality including image uploads, CRUD operations, and inquiry handling.
- Designed a responsive interface with dynamic property pages, search filters, and RESTful API integration.

### TalentConnectPro - Accessible Virtual Conference Platform | [fronttct.vercel.app](#)

- Built a full-stack platform (React.js, Express.js, MongoDB) enabling students with disabilities to join virtual conferences and showcase their talents.
- Implemented secure authentication, event management modules, and real-time community interaction with a responsive Tailwind CSS UI.
- Designed scalable RESTful APIs and optimized database schemas to support 15,000+ participants.
- Applied accessibility-focused design principles to ensure an inclusive, secure, production-ready experience.

### CrickVerse - Cricket Products E-Commerce Platform | [cricket-dun.vercel.app](#)

- Built a full-stack e-commerce platform for browsing and purchasing cricket gear and equipment with a responsive, catalog-style UI.
- Implemented product listings, search/filtering, shopping cart, and checkout flow with a RESTful API backend.
- Designed a scalable database schema for products, orders, and users, deployed on Vercel for fast, reliable delivery.

### FixMyOoru - Report Local Problems | [fixmyooru.vercel.app](#)

- Developed a scalable home-services platform for booking repair and maintenance services such as plumbing, electrical, and appliance support.
- Built secure authentication, scheduling, technician assignment, and real-time tracking features.
- Optimized performance with Vercel deployment and SSR, and enhanced UX through responsive UI, seamless navigation, and efficient service-workflow automation.

## TECHNICAL SKILLS

**Languages:** JavaScript, Python, Java, C++

**Frontend:** React.js, Next.js, Tailwind CSS, HTML/CSS

**Backend:** Node.js, Express.js, REST APIs

**Databases & Cloud:** MongoDB, MySQL, Firebase, AWS

**Data & ML:** NumPy, Pandas, Scikit-learn, Matplotlib, Jupyter Notebook

**Tools:** Git/GitHub, Linux, Vercel, Render

## EDUCATION

**M.Sc. in Computer Science - St. Joseph's University**

2024 - 2026

**B.Sc. in Computer Science - Jain University**

2021 - 2024

## RESEARCH & CERTIFICATIONS

**Research:** "Smart Navigation System for Autonomous Cars Using GPS and AI" - researched combining GPS with AI for real-time route planning, obstacle detection, and adaptive decision-making to improve navigation accuracy and safety.

**Certifications:** Full Stack Web Development (Udemy) | Cloud Computing, AWS Academy (2025)
